

Hello there, I have been a faithful subscriber to satellite radio now for about two years. I love my XM radio, I love having an option on the radio, I like to not be stuck with the same old thing. I like that they (XM radio) give me things like Traffic, weather, News and sports radio. I pay for these options, I don't think anyone should have the right to take these things away from me. Not the guy next door nor the National Association of Broadcasters, who should not care what I am paying for to be able to listen to. I am sure they have much better things to do with their time. Thanks for listening to me, Greg
